About Me

I am passionate about data analytics. Through various data analysis projects, I have developed skills in data cleaning, data visualization, and business-oriented insight generation. I am eager to learn, able to work both independently and in a team, and ready to contribute to transforming data into more effective decisions.

Education

RevoU

Feb 2026 - Jun 2026

Full Stack Data Analyst

- Learn and perform data analyst step by step process by understanding the business problem, and mastering several BI tools such as SQL, Python, spreadsheet, and data visualization tools (Tableau)

CCIT Faculty of Engineering, Universitas Indonesia

Jul 2018 - Oct 2020

Information Technology | GPA: 3.27
